

date February 4, 1976  
memo to James G. Haughton, M.D.  
from Leonidas H. Berry, M.D. *Lee ad*  
re Recruitment -- Internist. Further discussions with  
Dr. Donald Wilson

I had dinner with Dr. Wilson during which time there was considerable discussion with reference to the desire and the needs for continuous improving and upgrading of the attending staff at CCH. We noted previous discussions along these lines. Dr. Wilson gave me the names of two outstanding internists, both are located out of town. He stated that they might possibly be interested. Although they both have important positions at the present time, one has expressed at least a mild interest in making a change. Dr. Wilson stated that he will continue to keep an eye out for well-trained internists who might fit into the picture. He further stated, however, that because of the turn of recent events and the widespread publicity given to the same, he felt that it was no longer appropriate that he should be further considered at this time.

I will make an initial contact with the men mentioned by Dr. Wilson after I have had a chance to discuss them with you.
